

**In September, we would like to evaluate the CitieS-Health project and identify the impacts it had on the participants and the community of Barcelona. This means that we would like to evaluate what were the positive and negative effects that the CitieS-Health project generated on citizens and the community. Carrying out an impact evaluation will help us improve future scientific projects with the public.**

**An example of the impact of the project could be that participants now have more knowledge about how air pollution can affect mental health. Another impact could be that participants are now more interested in participating in similar projects because they enjoyed their experience with the CitieS-Health project.**

**To create the impact evaluation survey, we believe it is important to first ask our participants what they would like to evaluate and what they think are the main impacts of the project. We have prepared a very short questionnaire for you to tell us. It should take about 10 minutes to complete.**

- 
1. What is your name?
  2. What is your email address?
  3. In which of the following activities have you participated?
    - Identification and / or voting of the research question
    - Measurement of air quality through strawberry plants
    - Experiment design workshop
    - Workshop on governance and decision-making
    - Data collection through the app and / or the Kit
    - Data analysis workshop
    - Results and action workshop
  4. Have you ever made an evaluation of a project (it does not have to be specifically the evaluation of a scientific project, it can be other types of projects, such as a business project)?
    - Yes
    - No
  5. Do you think that evaluating the impacts of the CitieS-Health project is important or not? Why ?

6. **What do you think has been the most important impact of the project?** *Example : "I think the most important impact of the project was educating people about the effect of air pollution on mental health." "I think the most important impact of the project was to help strengthen relationships between the public and scientists."*
7. **Are there one or more impacts of the project that you would like us to evaluate?**  
*Example of answer:"I would like to know if the project has motivated the participants to want to get more involved in similar research projects"*
8. **Would you be interested in reviewing the final evaluation survey with us before sending it to all project participants in September?**
9. **Do you have other comments or suggestions?**
